

# Appointment Module

Target release	26-01-2024
Document status	IN PROGRESS
Document owner	Nafiul Aziz Ifty
Designer	Mr. Z
Tech lead	Mr. Y
Technical writers	Mr. X
Quality Assurance	Mr. Tester

## 🎯 Objective

Patient can make appointments easily.

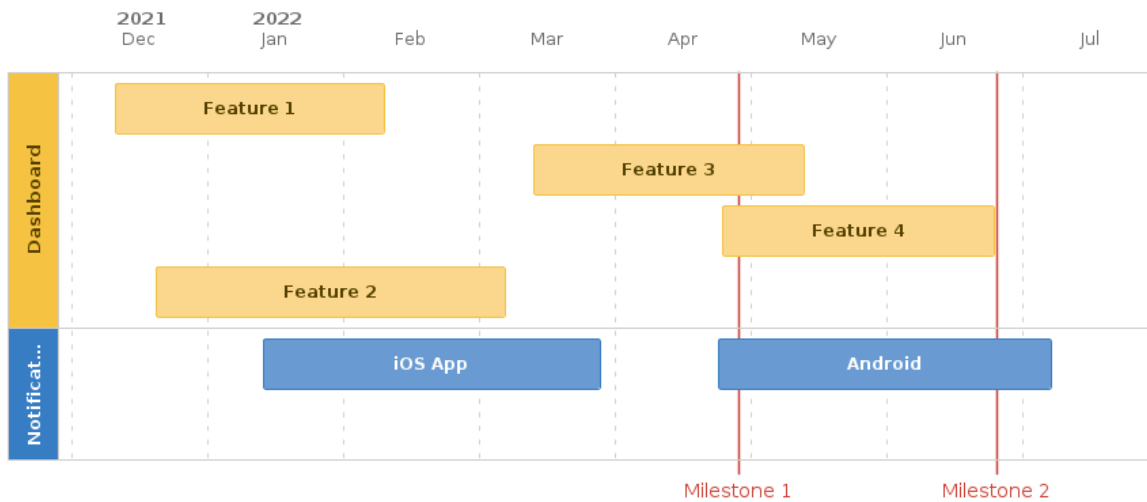

## 📊 Success metrics

Goal	Metric
Online Appointment	from their home through system
Offline Appointment	by calling over a phone
Search Patient info using UID	collect info from database

## 😬 Assumptions

If the patient make a offline appointment without register his/her profile, then he/she need to register first.

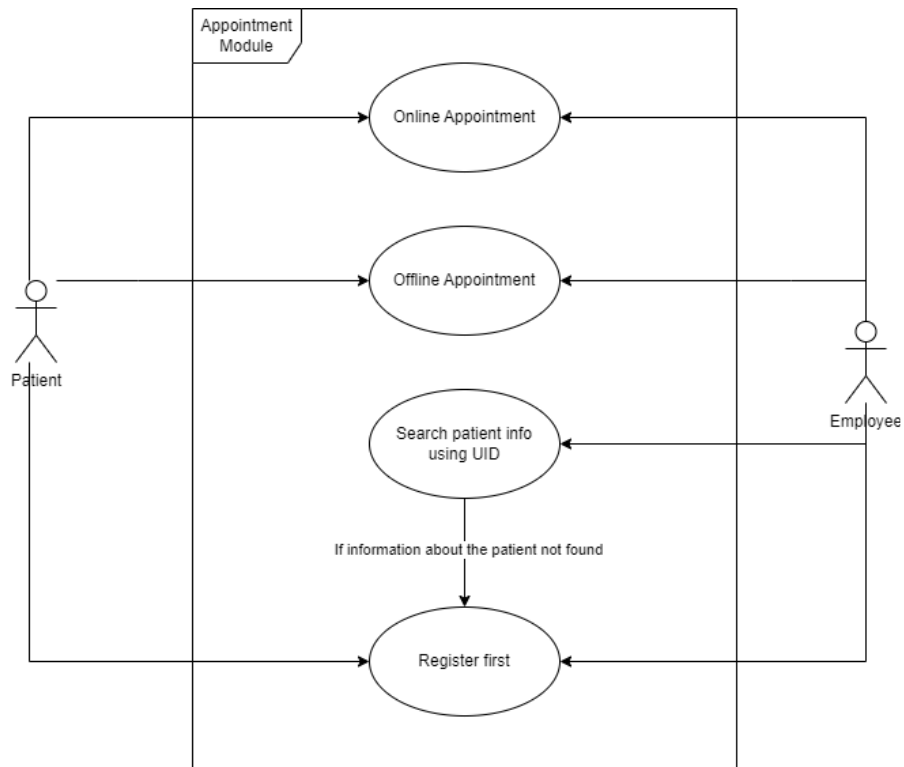

## 🌟 Milestones

## Requirements

Requirement	User Story	Importance	Jira Issue	Notes
online appointment	When they login using their UID and password their will be option for appointment. They just have to choose the doctor and his/her schedule time. In return they will provide a token for the appointment.	HIGH		
offline appointment	Sometime people make appointment using number. Then receptionist have to search the info about the patient if they have UID then they will make the appointment for the patient and send a appointment details on the phone.  If they don't have the UID so they need to create a profile and give all the medical history. To give the patient a better treatment. To know about their problem more up-close.	HIGH		
search Patient info using UID	To collect the medical history of the patient from the existing database for their treatment.	HIGH		

## User interaction and design

## ? Open Questions

Question	Answer	Date Answered
how non register patient make appointments?	by registering on the system	28-09-2023

## ! Out of Scope

- Send notification to the for appointments.
- Provide the registration link for offline appointment so that they can register by themselves.
